• GitHub	5 months

SOFT SKILLS

Problem-solving

PROJECT DETAILS

- Accurascan - Digital KYC

Project Description: ID Verification & Digital KYC with Face Match / Biometrics & Authentication - All in Realtime When your business depends upon knowing your customers, then you need powerful AI Based ID Verification technology. Accura Scan is a regtech leader in eKYC, offering an innovative User Verification environment that seamlessly integrates into any existing technology covering all the countries globally. The process starts with scanning a National ID card or Passport or any other Civil ID and then using a Certified Selfie Technology it does user authentication in realtime all quickly and efficiently with a feature-rich Face Biometrics and Liveness Check. Our digital KYC solution makes it easy to scan IDs, documents, and even perform face recognition. Our solution is designed to reduce transaction friction while enabling a more powerful way to work and fight mitigating online fraud.
