As a iOS developer, I design and build applications for the iOS native platform. Modified existing apps to correct errors, upgrade interfaces and improve performance. Wrote maintainable and extensible code in a team environment. Unit-test code for robustness, usability and general reliability. Upload build on App Store manage approval process for live builds access by real users.

INDUSTRIES: Health and Fitness

TECHNICAL SKILLS

• Swift	5 years & 5 months
• SwiftUI	5 years & 1 months
• REST API	5 years
• Push Notifications	4 years
• WearOS	4 years
• NodeJS	4 years & 2 months
• Cocoa Touch	4 years
• WatchOS	3 years & 8 months
• ObjectiveC	3 years & 2 months
• RxSwift	2 years & 2 months

SOFT SKILLS

Communication, Critical thinking, Time management

PROJECT DETAILS

• Presence.fit — January-2021 - September-2021

Project Description: PERSONALIZED WORKOUTS Train in daily small-group sessions where a personal trainer will see and coach you through a video call. Your trainer will guide and motivate you through each workout to unlock your full potential! Each workout lasts 20-40 minutes and can be customized to your personal fitness level. NO EQUIPMENT REQUIRED Dumbbells and a yoga mat are recommended, but no equipment is required—just bring your phone, and your trainer will guide you through the rest! CONNECT WITH FRIENDS Train privately, or share your video with friends for an amazing social workout experience. ON-DEMAND WORKOUTS Can’t make it to a live session? Experience our full library of on-demand AI-training. Our revolutionary workouts evaluate your form, pace, and reps to offer real-time targeted feedback.
Responsibilities: Developed the app from scratch to final product. Build the features below: ✓ User profile ✓ AI supported ✓ Camera ✓ Apple Watch integration

• Walkingspree January-2022 - May-2023

Project Description: Walkingspree helps companies/insurers control health care costs by getting members moving with a fun and motivating group program. Our proven wellness program applies modern technology to a simple concept to get results. For more information, visit www.walkingspree.com The Walkingspree Activity program is designed to pull validated data from Fitbit, Garmin, Apple Watch and Smartphones for challenges, gaming, and reporting. Walkingspree also has an open platform that connects with mobile phone applications such as Apple Health Kit, which will allow almost any activity tracker or mobile app to share validated data with Walkingspree. This enables members already having a device to connect to Walkingspree's activity tracking platform. This Walkingspree program is offered only to members of employers or health insurers who sponsor this activity program on member's behalf. Your program is paid by your sponsor.

Responsibilities: Developed all the features and app from scratch. FEATURES - Quickly set goals and view progress toward personal and program goals. - Track food and calories consumed while on the go. Our database contains 65,000 food and restaurant items plus 7,000 recipes. Sort food into meals and monitor calories burned vs. calories consumed. - Visual activity statistics are broken down by day, week, month, quarter and year or through a chosen date range. - See the Top Walkers in your sponsored group and where you are placed. - Participate and be motivated by Team competition. - Invite, motivate and compare your stats with your friends. - View your Challenges. See progress of your sponsor established individual challenges. - Participate in fun team Challenges such as Virtual Walks, Star Wars Challenge, Olympic-style Challenge, and Team Tournament Challenge. Track progress of your team and members of your team. - See your earned activity and challenge badges - Automatically syncs with your device health app such as Fitbit, Garmin, Misfit or Apple Watch. - In app progress notifications for Challenges, badges and program updates - Shop for your Activity Tracker - Comprehensive support built into App for device or program help.
