Full Stack Mobile Engineer with 6+ years of experience in building amazing mobile apps recognized and featured by Apple. Passionate about creating innovative and user friendly mobile solutions.

INDUSTRIES: Education, Media and Communication, Health and Fitness

TECHNICAL SKILLS

• Swift	6 years
• iOS	6 years
• Xcode	6 years
• Android	2 years
• Backend	1 years

SOFT SKILLS

Communication, Time management, Critical thinking, Teamwork, Problem-solving

PROJECT DETAILS

• - imagi - learn to code in python

Project Description: - The imagi app makes programming fun, creative and social. This iOS app has launched countless coding journeys. - Recognized by Apple in various App Store features, Apple Events, Apple Retail Stores worldwide, as well as the Apple newsroom & developer sessions. Moreover, tech publications such as TechCrunch & CNET, as well as Product Hunt, have highlighted its success.
Responsibilities: - Lead imagi's technology infrastructure and ensuring the timely delivery of software products including iOS, Android and Flutter apps. - Added new levels to the user playing journey using Core Animation & SpriteKit in order to increase user retention & drive more installs. - Worked on automating coding challenges & adding integration tests on backend which helped the product team save time and effort. - Lead and developed an offline version of the app & worked with Apple on creating a demo retail app which ended up featuring in Apple Stores worldwide.
Technologies: Swift, iOS, Xcode, UIKit, CoreAnimation, SpriteKit, Android, Java, AWS Lambda, AWS DynaoDB, Python, etc
Industry: Education

• - Less - Alcohol Tracker

Project Description: Less is a simple, elegant, intuitive tool to help people who drink alcohol do so more mindfully, and make space for more drink-free days. Featured on App Store in Apps We Love Right Now.
Responsibilities: - I had the opportunity of working on some great iOS apps like Less and contribute to their development lifecycle. - Added some amazing design components using SnapKit, Autolayout and Programmatic UI. - Worked on an iOS project with no storyboard having MVVM design pattern built with RxSwift.
Technologies: Swift, iOS, UIKit, etc
Industry: Health and Fitness
