Time management, Communication, Problem-solving, Critical thinking, Teamwork

PROJECT DETAILS

• Indian Railway Employee Directory May-2020 - September-2023

Project Description: It’s an employee directory for Indian railway employees.it has one mobile app and admin panel .Indian railway were having problems managing phone numbers as when employees get transferred they need to leave their cug number and that number will be assigned to someone else . This application was built to solve this problem and Manage phonebook directory of Indian railway as per zone, division and section. super admin can provide division-wise controlled contact detail access with different admin user. Where he can assign multiple zones to a single user where he will be able to manage contacts from that zone only. Employees will be able to search contacts from mobile applications. Employees can manage their profile and raise transfer updates so the admin can approve it .

Responsibilities: As a full-stack developer, was responsible for front-end development of the entire application, back-end API’s and server deployment.

Technologies: Postgres, Node.js, Angular, Flutter

Industry: Transport and Logistics

• Table Buddy June-2022 - November-2022

Project Description: It’s a Kiosk product for the educational sector of the UK. For licensing & to provide controlled access to certain apps in the system, and a super-admin panel was provided to manage restrictions

Responsibilities: As a Full-Stack Developer, I was responsible for building a kiosk application and integration of API’s to the backend. Developed admin panel using MEAN stack technologies to do the management & allocation of Devices, Users, Scribeasy & License. Multiple user roles as per the assigned access to the respective devices

Technologies: Electron, jQuery, Node.js, Angular, Express.js, Scribeasy API, ADOS Robo API, Postgres

Industry: Education
