I have 6+ years of building iOS applications from scratch and have worked as a full-stack iOS engineer. I have collaborated with many teams and have delivered projects on time. I have trained/onboarded the new college graduates on my projects and have delivered projects on tight deadlines due to the nature of the projects.

INDUSTRIES: Healthcare, IoT

TECHNICAL SKILLS

• iOS	6 years & 2 months
• Swift	5 years
• C#	1 years
• RxSwift	1 years
• ObjectiveC	6 months

SOFT SKILLS

Time management, Critical thinking, Communication, Problem-solving, Teamwork

PROJECT DETAILS

• DHA July-2017 - March-2020

Project Description: We have built 2 applications for a Dubai Health Authority - DHA client. One is the customer-facing application which is used to give live updates & news to the health professionals and the facilities who have applied/awaiting their health licenses to operate in Dubai. The other application is for the internal users of the DHA who inspects the facility and they make sure that everything is as per compliance. They conduct routine inspections and can issue a violation at any time.
Responsibilities: I built these applications from scratch and was there in Dubai to make our application live. It was a digital transformation project where the health professionals can apply for their license to operate in Dubai and the health facilities can register with us to get a license to operate.
Technologies: Swift, Objective C
Industry: Healthcare
