Software engineer with a focus on iOS applications and SDK development. Currently (living) residing in Nepal KTM. Specializing in the development of iOS Applications & SDKs. I'm highly skilled in both Swift & Objective-C. I do server-side back-end work (including Swift), and am also a SQL database administrator and comfortable working on AWS. So, while my primary focus is iOS and Swift, I have a very broad background and can handle the entire project -- top to bottom. I'm comfortable with all the standard iOS technologies, such as UIKit, Foundation, CoreAnimation, AVFoundation, ARKit, SceneKit, Vision Framework, MapKit, Core Graphics, Core Audio, Core Bluetooth, push notifications, and many others, including the new SwiftUI and Combine frameworks, and Sign In with Apple, etc. I've integrated with many 3rd-party frameworks, services, and REST APIs, such as Facebook, Twitter, Firebase, Twilio, AppsFlyer, Flurry Analytics, Stripe, GameAnalytics, Google Mobile Ads, AdMob, Chart-boos, Third Presence, MoPub, various Bluetooth integrations, and many others. On the server side, I've used primarily Firebase and server-side Swift, generally running on Amazon AWS EC2, S3 & Simplify API.

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• Swift	7 years & 6 months
• ObjectiveC	3 years & 2 months
• SwiftUI	2 years
• RxSwift	2 years & 2 months
• Combine Framework	2 years & 2 months

PROJECT DETAILS

• Ludimos — September-2021 - February-2023

Project Description: Ludimos helps cricket coaches with training schedules, and training drills and provides the most advanced video analysis platform to review and provide.
Responsibilities: my role in this project adds some features to an existing project. using moya and combine + Rxswift for Json fetch. using MVVM architecture
Technologies: swift
Industry: Software and Platforms
