• Elephant Social June-2018 - December-2018

Project Description: Elephant Social, is the best way to manage social media. We provide the platform that makes social simple.Register for a free trial to see how we can help you today. Our app allows you to see your posts in the perfect way. This is not some IT platform for geeks, it’s the perfect solution for normal business people who want to get on with their main work. Modules worked on : Filters on Camera, Stickers on Camera, Maps with emotes to post , Tinder like Votes and Reminder on calendar with Events

Responsibilities: Manage the complete mobile application development process from scratch to the App Store. Inject new UI patterns and cool animation effects for better engagement of user with apps. Handling various technical aspects example coding of modules using the given design specifications, debugging and fixing the defects as well as analysing its root cause. Understanding & mapping client’s requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.

Technologies: Swift, Objective-C, Xcode, Github

Industry: Entertainment

EMPLOYMENT HISTORY

• iOS Developer November-2022 - June-2023

Description: Developing various modules, logics and UI element. Providing POC on new technologies to be implemented in the same.

• Senior iOS Developer July-2022 - October-2022

Mahindra Group

Description: Worked on implementing new vehicle integration - XUV400 EV and various new modules relating to the vehicle - Coordinated with team members for system design, integration, application maintenance

• Technical Analyst - iOS November-2019 - March-2022

Firminiq Systems

Description: Developing various modules, logics and UI element in various OMRON apps. Providing POC on new technologies to be implemented in the same. Lead team of 6 developer across various time zones

• Senior iOS Developer August-2017 - October-2019

iApp Technologies LLP

Description: - Manage the complete mobile application development process from scratch to the App Store. - Inject new UI patterns and cool animation effects for better engagement of user with apps. - Handling various technical aspects example coding of modules using the given design specifications, debugging and fixing the defects as well as analysing its root cause. - Designed and developed Apps of different genres for IOS platform. - Coordinating with team members for system design, integration, application maintenance, etc. - Understanding & mapping client’s requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.

• iOS Developer September-2015 - August-2017

Kindlebit Solutions Pvt. Ltd.

Description: - Manage the complete mobile application development process from scratch to the App Store. - Inject new UI patterns and cool animation effects for better engagement of user with apps. - Handling various technical aspects example coding of modules using the given design specifications, debugging and fixing the defects as well as analysing its root cause. - Designed and developed Apps of different genres for IOS platform. - Coordinating with team members for system design, integration, application maintenance, etc. - Understanding & mapping client’s requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.

• Jr. iOS Developer May-2014 - June-2015

Cogniter Technologies

Description: - Manage the complete mobile application development process from scratch to the App Store. - Inject new UI patterns and cool animation effects for better engagement of user with apps. - Handling various technical aspects example coding of modules using the given design specifications, debugging and fixing the defects as well as analysing its root cause. - Designed and developed Apps of different genres for IOS platform. - Coordinating with team members for system design, integration, application maintenance, etc. - Understanding & mapping client’s requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.

CERTIFICATION

• iOS Development by MultiSoft Systems 2014

EDUCATION

• Bachelors degree in Computer Science from Punjab Technical University 2010 - 2014

LANGUAGES

• English - native
