• Picasse Receiver January-2020 - January-2023

Project Description: Picasse Receiver This app is part of the Picasse platform. This platform helps (larger) organizations to communicate in the event of accidents, aggression, criminal offenses, evictions, calamities, technical disruptions, IT incidents, crisis situations and emergencies. This app allows you to receive alerts and notifications. You can see the nature and location of an event and you can let others know if you are nearby and if you are going to respond. Through our platform, this app can be used to receive alarms and notifications from external systems (PLCs, fire detectors, etc.). Our platform is used by many organizations for emergency response, First Aid, Crisis management communication, (IT) Service management communication, safety of lone workers, etc.
Responsibilities: Contributed to development of Picasse Receiver iPhone applications.Swift, Google Map, Geofence, Notifications, Firebase/Crashlytics, VialerSIPLib, Alamofire.
Technologies: Swift
Industry: Health and Fitness
