As an experienced mobile app developer with 9 years of experience, I specialize in building high-quality iOS and Android apps using Swift, Objective-C, Kotlin, Java, React Native and Flutter. I have a deep understanding of backend development in Node.js as well. I have a passion for staying up-to-date with the latest technologies and tools in the mobile development industry, and I bring that passion to all of my projects. If you're looking for a developer to help bring your app idea to life or to improve an existing app, I have the skills and experience needed to deliver high-quality results. I always focus on the quality of product and timeline. My solid experience provides development process smoothly, fast and with high quality thus the apps are stable, scalable, transparent and user friendly. As a freelancer who is looking for a fulltime position, I can start immediately and work 40 hours a week. Looking forward to hear back from you. Best Regards, Xihong.
