iOS developer with 3 years of experience, which I'd like to think makes me a bit of an expert on all things Apple. I spend most of my time coding in Swift and Objective-C, but let's be real, my true passion is for Apple products themselves. In fact, I'm pretty sure my love for Apple runs deeper than my love for pizza, which is saying something. When I'm not busy writing code, you can find me eagerly waiting for the latest Apple product announcements, or preaching to my Android-using friends about the benefits of iOS. I'm not gonna lie, I may have shed a tear or two when Steve Jobs passed away. I take my work seriously and strive to create the best possible user experiences for the apps I develop. I'm constantly learning and growing, and I look forward to what the future holds for me in the iOS development world.

INDUSTRIES: Ecommerce, Music, Travel

TECHNICAL SKILLS

• ObjectiveC	3 years
• API Integration	3 years
• Flutter	2 years
• Swift	2 years
• JavaScript	2 years
