Over 4+ years of experience in Mobile Application Development. Proficiency in iOS app development. Hands-on experience in application architecture, design principles, coding, debugging, deploying, and monitoring the app. Familiarity with tools like Xcode, Cocoa-pods. Rock-solid at working with third-party dependencies and debugging dependency conflicts. Understanding REST APIs, offline storage, threading, and performance tuning. Good knowledge of Firebase and Google APIs integration. Ability to integrate In-app purchases. Familiar with code management, defect management, ticket, and project management tools. Strong communication skills to collaborate with stakeholders and other cross-functional teams. Proficient in code versioning tools like GIT. Having knowledge of AppStore publishing and version maintenance. A positive attitude.
