Software Engineer specialised in developing for iOS platforms. Solid background of computer science and programming skills. A self-motivated, quick learner and a good Team player. Moreover, I will try to learn deeply in my profession. By doing so, I will be able to do my job more proficiently and faithfully. Over 5 years of experience in the area of software development for iOS. Experience of working on iOS platform and frameworks using Swift, Objective-C and Cocoa Touch frameworks. Experience in evaluation, design, development, testing, maintenance, and production using the SDLC process and AGILE Methodologies. Experience with various design patterns such as Singleton, Delegation, Notification, MVC, MVVM, etc. Knowledge of professional software engineering practices and best practice for the full software development life cycle, including coding standards, source control management, build processes, testing, and operations. Taking care of Swift concepts like memory management and concurrency

INDUSTRIES: Ecommerce, Food and Beverage, Entertainment, Services, Healthcare
