I have 7.5 years of experience in iOS Application development, where I have been recognised as a key contributor towards the project. I am responsible for the complete development lifecycle from initial design, API, coding, testing and deployment. Have architected robust large scale applications with 10 million+ active users and App Store rating of 4.8 with 155K+ reviews. I have worked in an agile environment having continuous development and continuous integration. My technical expertise includes Swift, Objective-C. I provided direction and interaction with the developers, along with the general research responsibilities for efficient and rapid development. I have also led a small team of software developers and test engineers for medium and large projects, providing technical direction and decision process for all aspects of application development, security, and infrastructure.

**INDUSTRIES:** Entertainment
