PROJECT DETAILS

• QatarStadiums March-2022 - September-2022

Project Description: The availability of Stadium Information with the facts and figures along with various stadium services of all the 8 stadiums in Qatar in one click makes the application unique. Stadium Services include Medical and Disability services, Transportation services, Parking Services, Venue Booking, Free Stadium WiFi Connection, Al Bayt Park, Stadium Facilities Safety & Security and Fan Zone details. Booking a stadium venue through the application will provide an exemplary experience to the user by allowing them to view all the venues and details before booking. Another interesting feature which gives the details of each tree planted in Al Bayt park along with navigation aid till the tree makes the application remarkable.

Responsibilities: Wrote architecture of whole app and specifically developed a module including features like showing available POI in AR, wayfinding to selected POI through AR, Showing details of all trees in Al Bayt park.

Technologies: Swift5.0, iOS 13.0 above, Xcode 13.4, Alamofire, SwiftyJson, AR, Firebase, MapSted, XCTest

Industry: Sports and Gaming
