I'm a professional iOS application developer having vast experience in designing and developing Rich User Interface applications, integrating with various Databases and Client-Server applications in iPhone/iPad application development using Objective C and Swift. Worked on various architectures such as MVC, and MVVM. Experience in using version control and bug reporting tools like Jira, Azure, Asana, Github, source tree, SVN, and Code commit. Experience taking a project from scoping requirements through the actual launch of the application. Knowledge of professional software engineering practices and best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations. Excellent communication, organizational skills, attention to detail, and the ability to meet tight deadlines.
