I am an enthusiastic iOS Developer having 1.8 years of experience in mobile app development. Seeking for new opportunities to work and learn . I have proven experience in Swift programming language apart from that I have knowledge in Java.

INDUSTRIES: Sports and Gaming, Hospitality

TECHNICAL SKILLS

• Swift language	1 years & 8 months
• Java	1 years & 2 months
• Native Ios	1 years & 8 months
• UI kit	1 years & 8 months
• Swift ui	1 years & 8 months

PROJECT DETAILS

• Tenmates — September-2022 - December-2023

Project Description: Tennmates is an app designed for tennis players. In the app, users can create leagues, select clubs, add players to their respective teams, and engage in games with opposing teams. Scores can be set within the app, allowing users to determine the winner by entering scores directly into the application.
Responsibilities: I have worked on features like loading list with the data from the api and worked on bugs as well as unit test of related feature before committing it.
Technologies: Swift , Swift UI
Industry: Sports and Gaming

• Mindoula — May-2022 - August-2022

Project Description: Mindoula is a project related to hospital industry where a patient can directly interact with the doctor by taking an appointment virtually.
Responsibilities: I have worked on features related to the app developed a feature related to filtering of unread messages and showing the details, I have took the responsibility of entire process until the deployment of the feature.
Technologies: Swift, Uikit
Industry: Hospitality
