• Daallo Airlines

Project Description: Daallo Airlines (daallo.com) is based in Kenya and flies to several counties including UAE and Saudi Arabia. In order to make it easier to book its flights, Daallo wants to create mobile app for its customers. Daallo passenger reservation system is hosted by HITIT (hitit.com). HITIT provides API that online travel agents can use to integrate with given airline. The mobile app will be using this API to give customers access to Daallo reservation system. Customers will use their credit cards or wallets to purchase Daallo tickets. For credit card payment, Cellulant payment processor will be used. For wallet payments, we will use WaafiPay payment processors. These two payment integration will be needed.
Responsibilities: I contributed in UI and Business Logic such as deep linking, payment gateway integration, rest api integration.
Technologies: Payment gateway , Git , Jira , Xcode 13 , Push notification
Industry: Airline
