I am skilled iOS Developer with 2.5 years of experience in creating efficient and user-friendly mobile applications. With a strong foundation in Swift, SwiftUI, and Firebase, and other native frameworks I have developed a keen eye for detail and a passion for creating high-quality apps that enhance the user experience. I have also gained real-world experience through internships. I have worked with clients to develop customised iOS applications that meet their unique needs, demonstrating their ability to communicate effectively and deliver quality work on time. In my free time I enjoy exploring new technologies, reading, and participating in online communities to share their knowledge and learn from others.

INDUSTRIES: Blockchain, Capital Markets

TECHNICAL SKILLS

• Swift	2 years & 1 months
• SwiftUI	2 years & 1 months
• Firebase	2 years & 1 months
• Cloud Firestore	2 years & 1 months
• Core Data	1 years & 1 months

SOFT SKILLS

Leadership, Event Management, Writing, Public Speaking, Time Management

PROJECT DETAILS

• Krypton

Project Description: 1. It is a live Cryptocurrency manager application where users can view the live prices of each Cryptocurrencies. A user can see the performance of each Cryptocurrency over a month represented via a graph. 2. Users can add and remove Cryptocurrencies to and from their account. Users profile picture is stored to file Manager and uses Core Data to save current users portfolio
Responsibilities: I had all the responsibility as it was a solo project.
Technologies: Swift, SwiftUI, Combine, File, Core Data, MVVM architecture pattern.
Industry: Blockchain

• Visits

Project Description: 1. It provides functionalities to add business by advertisers and get their business advertised when people visits its nearby locations. Apart from advertisers, normal people can use it as navigation application where they can search nearby locations based on categories such as cafe, college, hospitals etc. 2. Advertiser can get an detailed accounts of customer visits to their shops as advertised by the application.
Responsibilities: I had all the responsibility as it was a solo project.
Technologies: Swift, SwiftUI, Firebase, MapKit, MVVM architecture pattern
Industry: Capital Markets

EMPLOYMENT HISTORY

• iOS Developer Intern February-2023 - March-2023

Description: • Implemented UI using SwiftUI, incorporating animations and transitions for an enhanced user experience. • Established a Networking Layer adhering to the MVVM architectural pattern, for efficient data communication. • Developed APIs for application using Node.js, enabling efficient communication and data transfer between the front-end and back-end of the application.

• iOS Developer Intern December-2022 - January-2023

Vasukam

Description: • Demonstrated proficiency in both front-end and back-end, adhering to the MVVM architectural pattern. • Implemented a new onboarding user interface utilizing SwiftUI, integrating it seamlessly with the back-end. • Implemented Firebase authentication using OTP verification, streamlined the data models for back-end.

EDUCATION

• Bachelors degree in Computer Science from Indian Institute of Information Technology Vadodara 2020 - 2024

LANGUAGES

• English - advanced
