iOS Developer with 3+ years of experience, with knowledge of architectures, trends & emerging technologies, familiarity with frameworks & web technologies. Experience in development using the common mobile technology stacks in iOS App Development, Deployment and Analytics Platforms. Good at gathering requirements around functionality and translating those requirements into elegant functional solutions. I am skilled in optimising performance for the apps, explaining technologies and solutions to technical and non-technical stakeholders, and reversing engineers for debugging errors in code. I am looking to gain experience and expand my skills by working on a project that has scale.
