A Senior iOS Developer with 9 years of experience specializing in Swift, Objective-C, SwiftUI, and various iOS frameworks. Demonstrates a proven track record in leading development teams, mentoring junior developers, and delivering high-performance applications. Excels in Agile methodologies and has received awards for significant contributions to app development. Known for dedication to quality and innovation, consistently bringing exceptional value to development teams.

INDUSTRIES: Ecommerce, Communications and Media

TECHNICAL SKILLS

• iOS Development	9 years
• Xcode	9 years
• Swift	8 years
• Git	6 years
• Coredata	5 years
• ObjectiveC	4 years
• CICD	3 years
• SwiftUI	2 years & 6 months

PROJECT DETAILS

• Zigly June-2021 - June-2024

Project Description: Premium pet store for pet care products, accessories, healthcare, food & more. Looking for a seamless pet care experience for your furry friend? The Zigly pet store app makes it easy! We're your all-in-one platform for premium pet products and services, including wholesome food, fashionable accessories, expert grooming, online vet consultations, and more. Treat your pet to our wide selection, designed to keep them healthy and happy. Partner with Zigly and embark on a joyful journey of pet parenthood. · Simple to gourmet selection of meals suiting the whims of even the grumpiest eaters · Nutritious and wholesome food to nourish your pets from within · Explore with confidence, knowing your pet is wearing a collar that can keep up · Stylish leashes and harnesses that keep up with your buddy’s boundless energy · Durable and innovative toys for hours of worry-free playtime · Dress your buddies to impress with our trendy pet clothes · Spill-proof bowls with non-slip bases for stress-free mealtimes · Fresh breath and happy faces at every session of pet grooming · Colorful mats and beds to create the perfect spot for your pet to unwind after a day of adventures Download the Zigly pet shop app now and give your furry or feathery friends the best care at amazing prices. Get a whopping INR 500 off when you spend ₹2000 or more! Dress your pup in style for less with 40% off on all dog clothes! Discover exclusive offers and deals on everything your pet needs. * Cash On Delivery Available * Shipping Across Pan India
Responsibilities: For the Zigly project, my responsibilities as an iOS developer included: Development and Implementation: Architecting and developing the Zigly iOS application from scratch using Swift and SwiftUI. Implementing core functionalities and features as per the requirements, ensuring a seamless user experience. API Integration: Integrating RESTful APIs to enable data communication between the app and the backend server. Ensuring efficient data handling and real-time updates within the app. UI/UX Design: Collaborating with the design team to create a visually appealing and intuitive user interface. Implementing custom UI components and animations to enhance user engagement. Testing and Debugging: Conducting thorough testing of the application to identify and fix bugs or issues. Utilizing unit tests and UI tests to ensure the app's reliability and performance. Performance Optimization: Optimizing the app's performance, including memory management and efficient use of system resources. Implementing best practices to ensure the app runs smoothly on various iOS devices. Code Reviews and Mentorship: Conducting code reviews to maintain code quality and consistency within the team. Mentoring junior developers, providing guidance and support for their professional growth. Agile Methodology: Participating in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives. Collaborating with cross-functional teams to ensure timely delivery of features and updates. Documentation: Creating comprehensive documentation for the codebase, APIs, and technical processes. Ensuring that the documentation is up-to-date and accessible to the team. Continuous Integration and Deployment (CI/CD): Setting up and maintaining CI/CD pipelines for automated builds, testing, and deployment. Ensuring smooth and efficient release cycles for the app updates. User Feedback and Improvement: Gathering user feedback and analyzing app usage data to identify areas for improvement. Iterating on features and functionalities based on user feedback to enhance the overall app experience.
