+91 9820045154 | hr@talrn.com

I am an iOS developer having 7+ years of experience in Swift and Objective-C. I have strong knowledge in programming language and oops concepts. During my experience, I learned lots of things. Like how to manage a critical task, make code perfection, analyzed the task, clear design pattern, etc., The work I provide is of the highest quality, fully responsive, and tested in a wide range of devices. I take great care to ensure each project is well-architected, well-documented and easily maintainable so you can enhance an app as your company grows. I maintain a high code quality standard and use static code analyzer. Writing code that is documented and easy to read means it can be maintained and scaled in the future and allows co-workers to quickly work with it. I am familiar with working on deadlines, and I bring professionalism, communication, punctuality, and great attention to detail to your projects. I believe in collaborative, test-driven development, and my preference is to get a prototype in your hands as quickly as possible so that we are continually ensuring that the app being built is the app you intend.

INDUSTRIES: Productivity, Business

TECHNICAL SKILLS

• Swift	7 years
• MVC	5 years
• ObjectiveC	2 years
• Node.js	2 years
• MongoDB	2 years
